

Chapter 7: People Multiply and Dominate The Globe: The Modern Wave

Chapter 7.C. Charts and Puzzles

Charts

1. The World Around 1500

It can sometimes be confusing with this holistic approach since different developments took place around the world around the same time. The 1500 date is one such time. We see the beginning of modern developments in Western Europe but much of the rest of the world was unaffected. The chart *The World Around 1500* may help you organize world developments around the 1500 date.

2. Colonization: Early Modern Era (1500-1750)

A comparison of colonial countries, the areas they colonized and the consequences of their colonization.

3. 19th Century Ideologies

Comparison of conservatism, liberalism, socialism and nationalism.

4. Comparison of 19th Century European Social Classes

Includes the peasants, working class, middle class and elites.

5. Comparison of Newtonian and Einsteinian Worldviews

This is one of my favorite charts to new the challenge to the modern (Newtonian) worldview by post-modern developments in cinema, science, education, etc.

6. Imperialism 1870-1914

A list of imperialist countries and their conquests and consequences.

7. Nations/Mandates/ Protectorates following World War I (1918)

8. Comparison Chart: Laissez-faire and Managed Capitalism

This is a very important chart to note the differences in the types of capitalism, it changes according to government policies and world developments.

9. World War II Alliances

Charts all the nations in the war, basic fact, and the what happened to each nation at the end of the war.

10. Post War Decolonization (1945 Onward)

11. Fall of Communism: New Nations (1990 onward)
